Recognition: Handwritten Letter

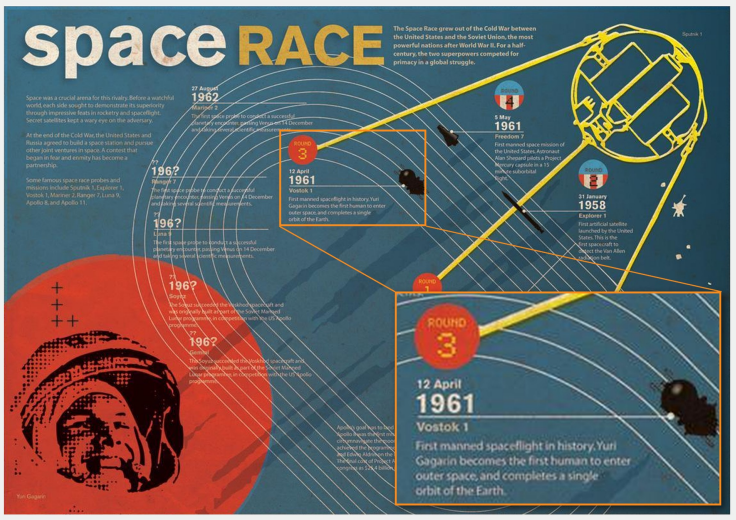

Q: Transcribe the handwritten text on the left page of this letter verbatim as a single paragraph. Preserve the original spelling and punctuation. Stop at the last word of the left page.

A:

that the school children were out of the school buildings when the worst shock came! In a letter written just before the earthquake, Mrs. Johns said she feared your health was not good. How are you? My old cousin who lives with me – Dr. Elizabeth Blackwell's adopted daughter, now 85, almost blind & very deaf, but bright in her mind – dictates to me letters to her old friends, and generally winds up by begging them to take good

Perception: Small Details in a Dense Infographic

Q: On which day Vostok1 was launched into space?

A:

To determine the launch date of Vostok 1 from the provided infographic, follow these steps:

1. **Locate the relevant section**: Scan the infographic for the text "Vostok 1". This can be found in the middle section of the image, slightly to the left of the center, under the heading "ROUND 3".
2. **Read the associated text**: The text block next to the date reads: "12 April 1961 First manned spaceflight in history. Yuri Gagarin becomes the first human to enter outer space, and completes a single orbit of the Earth."
3. **Identify the date**: The date listed at the top of this specific entry is "12 April 1961".

Therefore, Vostok 1 was launched on 12 April 1961.

12 April 1961
